DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1,8, drawn to a microscope with specifics of the secondary stage height adjuster, classified in class 359, subclass 392.
- II. Claim 2, drawn to a microscope with specifics of the secondary stage height adjuster and releasable stage, classified in class 359, subclass 392.
- III. Claims 3-5, drawn to a microscope with specifics of the secondary stage height adjuster and legs, classified in class 359, subclass 392.
- IV. Claims 6,7, drawn to a microscope with specifics of the secondary stage height adjuster and light source, classified in class 359, subclass 392.
- V. Claim 9, drawn to a microscope with specifics of the secondary stage height adjuster and handle, classified in class 359, subclass 392.
- VI. Claims 10,11, drawn to a microscope with specifics of the secondary stage height adjuster and container, classified in class 359, subclass 392.

Art Unit: 2872

VII. Claim 12, drawn to a microscope with specifics of the releasable stage and lens changer, classified in class 359, subclass 381.

VIII. Claims 13,14, drawn to a microscope with specifics of the releasable stage/lens changer and magnification levels, classified in class 359, subclass 381.

IX. Claims 15,20, drawn to a microscope with specifics of the releasable stage/lens changer and secondary stage height adjuster, classified in class 359, subclass 381.

X. Claims 16,17, drawn to a microscope with specifics of the releasable stage/lens changer and legs, classified in class 359, subclass 381.

XI. Claims 18,19, drawn to a microscope with specifics of the releasable stage/lens changer and light source, classified in class 359, subclass 381.

XII. Claim 21, drawn to a microscope with specifics of the releasable stage/lens changer and handle, classified in class 359, subclass 381.

XIII. Claims 22,23, drawn to a microscope with specifics of the releasable stage/lens changer and container, classified in class 359, subclass 381.

Art Unit: 2872

2. Claim 1 links inventions I-VI and claim 12 links inventions VII-XIII. Note that if applicant elects an invention depending from a linking claim, this linking claim will be examined along with the elected invention. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s). Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application.

Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2872

3. Inventions I-XIII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the inventions has separate utility as evidenced by their being separately claimed. Further, the claims of each of the inventions evidences that the combination does not rely on the details of the other inventions for patentability. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
